

BIOLOGY PROJECT

CLASS 6

TOPIC:

GERMINATION OF SEEDS INTO SEEDLINGS AND THEIR SUBSEQUENT GROWTH INTO PLANTS

[Take a handful of gram seeds and soak them in water for 24 hours, or till the radical comes out. Take soil in a pot and place the seeds in it. Watch till the seedlings come out. Take care of them so that they grow into plants. Record the entire procedure and the weekly development, along with the diagrams, in an exercise book.]

LAST DATE FOR SUBMISSION: JULY 15, 2014
